Feature：

- **Community Mapping Tool**

An anonymous map where users can tag incidents, safe spaces, or support points; also enables observation of geographic trends.

- **Distance-Based Resources**

Shows nearby legal, medical, and counseling services based on user location (optional and privacy-protected).

- **Resource Pages with Search & Filters**

Users can search and filter resources by keyword, category, or region.

- **Community Blog**

A blog section featuring educational posts and user-submitted stories, with optional anonymous contributions.

- **Encrypted Communication (Hushmail)**

Secure messaging integration allowing users to contact support without exposing personal identity.

- **"Hide Me" Feature**

Provides quick-access privacy controls to hide content.

- **Anonymous Feedback System (Future)**

Collects non-identifying user input to inform future updates and feature development.
